

"There are no compromises in aerospace manufacturing. Everything requires the most stringent processes and the very best techniques. And, of course, the best people in the industry.

We are proud to be perfectionists. There is simply no room for second best. You cannot achieve a global reputation as one of the best without it." - Carlos Broens.

AEROSPACE

Taking the **aerospace industry** to **new heights** through specialist engineering.

WWW.BROENS.COM.AU

"WE ARE PROUD TO BE PERFECTIONISTS. THERE IS SIMPLY NO ROOM FOR SECOND BEST." - CARLOS BROENS.

AEROSPACE

From aircraft components and ground support equipment to automated assembly applications, Broens specialist teams will design, manufacture and project manage large-scale operations. Supported by international offices throughout the USA, Europe and Asia, Broens Aerospace provides a strong local service with true global capability in sales, service and technical support.

Our integrated manufacturing systems are already in place, and we already exceed globally recognised industry certification and expertise. Our flexible plant can be configured to exact specifications, utilising large scale, multi-axis CNC machining centres up to 18 metres in length, with temperature controlled metrology inspection labs and laser tracking facilities.

Certified to ISO 9001:2000, Broens Aerospace is well equipped to provide and facilitate any aerospace project for both military and commercial applications.

And as well as our outstanding technology, you'll also get to work with some of the smartest minds in the business. Your dedicated project management team will keep you informed and up-to-date at every step of the process from design to delivery.

Component and Aerostructure Tooling Systems

Broens Aerospace designs, engineers and manufactures a wide range of tooling systems for both metal and composite component and aerostructure production including:

- Layup mandrels up to 30 metres in length
- Composite stringer tooling
- Metal and composite tooling
- Resin Transfer Moulds

Australian expertise taking off across the world.

Whether it is for military or commercial application, aerospace engineering and manufacturing is all about perfection. As a specialist manufacturer of Component and Aerostructure tooling systems, Broens Aerospace is second to none - an Australian company with a world-wide reputation for excellence.

Ground Support Equipment

With our unique combination of innovative design and state-of-the-art techniques, Broens Aerospace offers world-class, but cost effective, ground support equipment for both fixed and rotary wing aircraft.

- Customer specific applications - military and commercial
- Repair, maintenance and overhaul
- Dedicated assembly and test facility
- Reliable and cost effective service

Assembly Automation

We offer a full service for all aspects of assembly, including large capacity 3, 4 and 5 axis machining for components up to 18 metres in length.

- Customer specific applications - military and commercial
- Sophisticated manufacturing processes
