

# MARINE

Focused on delivering **marine specific products for designers and builders** -  
to exceed critical performance criteria.

**“MARINE IS WHERE UNCOMPROMISING PERFORMANCE MEETS BREATHTAKING TECHNOLOGY.” - CARLOS BROENS.**

# MARINE

**New techniques and continual design improvements have made marine one of the most fascinating areas where manufacturing can really determine performance.** But it's not all about technology and processes. We believe we have some of the best engineering expertise and know how in Australia - a dedicated local team with a truly global capability.

Using specialist materials and the latest advanced manufacturing processes, Broens Marine can provide the competitive edge for a wide range of projects.

We have a passion for performance. And we enjoy a challenge. That's why we always try and exceed the critical performance criteria of the competitive yachting industry.

Your dedicated project management team will also keep you informed and up-to-date at every step of the process from design to delivery.

## Broens Marine Specific Components

**Broens Marine offers a wide range of world-leading innovation and experience. Our expertise includes:**

- Large scale machining capacity up to 18 metres in length and 30 tonne in weight
- Precision machined scale models
- Complete fabrication, assembly and painting facilities
- Manufacture of bulkheads, jigs, dummy templates and tooling dies
- Exotic material machining expertise

## Performance through innovation.

From high-performance keels to precision marine components, Broens has quickly established a global reputation for excellence in the competitive marine industry. Through an integration of superior engineering capabilities and manufacturing technology, Broens Marine can provide the competitive edge.

### Yachting Industry Keels and Bulbs

**The right design requires balance, weight and precision.  
We pride ourselves in our yachting components and deliver perfect results every time.**

- Canting, fixed and trim-tab applications
- +/- 0.1mm tolerance
- Forged steels and stainless steel strut machining
- Calcium and antimony cast head ballast machining
- Tungsten ballast bulb machining

*"When racing a yacht, precision and durability are paramount. We pride ourselves in perfection - because perfection can be the extra second in speed or provide the edge to your performance.*

*Broens Marine was established with only one thing in mind; to be the best." - Carlos Broens.*
